

DURA-EDGE

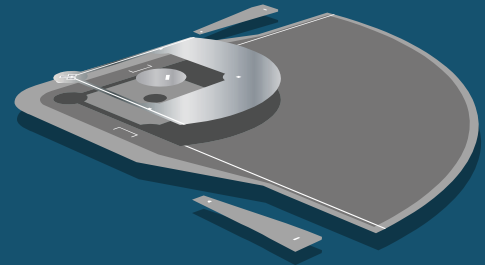

PRO-SLIDE

ENGINEERED CONDITIONER

PLATINUM

Typical Calcined Clay Issues:

- Migration and buildup
- Breakdown/Contamination
- High application rate

The ProSlide Platinum Solution:

- Greater hardness means less breakdown and increased durability resulting in longer lasting particles
- Medium sized particles presents uniform coverage
- Reduced amount of fines and smaller particles provides less clumping when dragging in wet conditions

Use as a stand-alone conditioner or combine with ProSlide expanded shale topdressing for greatest infield playability and predictable absorption percentages to fit your needs.

Delivery Options:

- 50 lb. Bags
