

FIELD ASSURANCE: KEEP YOUR FIELD COVERED.

Even properly formulated and installed infield mixes will degrade over time if not well-maintained. Proper maintenance takes time and is often overlooked until it's too late—cue the unexpected large spike in spending.

Field Assurance is here to combat that. As an exclusive and innovative program comprised of 3 different service plans, Field Assurance is designed to budget your maintenance costs—keeping your infields performing at the highest level and giving you that much needed peace of mind.

Maintenance is a process, not an event.

FIELD ASSURANCE SERVICE PLANS

<p>BASES LOADED</p>	<p>3-year Field Assurance plan for Certified Installation of 2-inch cap, 2-inch modified cap, 3 or 4-inch column as part of a renovation or new construction project. Plan renewal available and encouraged.</p>	<p>IDEAL IF:</p> <ul style="list-style-type: none"> You're ready to go all in on a Certified Install + want to protect your investment Your field is already certified + you want to make maintenance a priority
<p>DESIGNATED HITTER</p>	<p>A unique 2-year Field Assurance plan that incorporates the FieldSaver process for amending existing infield soils or progressing from a 1-inch modified cap to a 2-inch cap. Plan renewal is necessary in order to maintain a consistent playing surface. Intended for facilities that can't afford a certified 2-inch cap.</p>	<p>IDEAL IF:</p> <ul style="list-style-type: none"> A Certified Install exceeds your budget You're looking to gradually improve the conditions of your infield skin + you want to make maintenance a priority
<p>LEADOFF HITTER</p>	<p>Yearly maintenance plan/contract available for any customer or non-customer. Maintenance Contracts are intended for fields that have less than 2-inches of infield material, a slope that exceeds 1%, or have not been installed by a certified installer/can't be certified. Yearly contracts. Warranty not included.</p>	<p>IDEAL IF:</p> <ul style="list-style-type: none"> You're looking for a simple yearly plan to address maintenance You have a field that needs work You don't have a DuraEdge infield
